Project report,

   An Application on tableau data visualization.

         I am Sai Keerthana Pathakamuri i.e one of the participant of the tableau data visualization challenge conducted by the smart intenz in collaboration with the tableau from 13th april 2021 to 18th april 2021.

         After the completion of the 5 day bootcamp I am able to understand how to use the data and create many interesting dashboards and also I am able to analyse the data with the help of the boot camp.

Next ,here comes the 10 day interesting dataviz challenge where one can get exposed to the working with dashboards,stories with the help of tableau desktop and tableau public i.e a huge exposure platform.

The data viz challenge helped me to understand ,analyse and implement the data with the help of tableau software.I Hope many challenges and bootcamps will be conducted by smart internz team in future.

Thanking greatfully, the smart bridge team and tableau for such an interesting and knowledgeable bootcamp and challenge.
